PROWIN TOOLS have made air tools for over 20 years. Our range of professional spray guns are designed to perform in commercial environments, consistently delivering high-quality results and long service life. All Prowin Spray Guns are backed by a full range of spare parts, accessories and nozzles sets. Our range of professional spray guns are designed to deliver exceptional atomization performance and spray pattern control. All guns feature chrome, nickel plating or anodised bodies, which offer excellent solvent and corrosion resistance, even with water based paints. Nozzle and Needles are precisely machined from high-grade Stainless Steel for superb performance & durability.

## K818 Gravity Feed Spray Guns

Short fluid passages offer quicker cleaning and maintenance. Gravity feed requires less air pressure to drive fluid feed, resulting in a higher quality finish across a wide fluid viscosity range. Easy no mess fluid refilling with Quick-release lid. Centre of gravity is closer to the centre of the gun.

## K818 Suction Feed Spray Guns

Suction provides a mild agitating action to the fluid as the gun is being used. Suction Feed Spray Guns can carry larger amounts of paint while retaining gun stability. The configuration of the fluid pot offers access to tighter working spaces. Achieves quality finishes with light viscosity paints or stains. Suitable for adhesive coatings, specialised coatings or textured finishes.
